

GROWTH AND EXPANSION

SIBUR expands Vienna office of its trading arm SIBUR International GmbH.

SIBUR has expanded the Vienna office of its trading arm SIBUR International GmbH as yet another step in strengthening the Company's customer focus. The additional space rented as part of the expansion was retrofitted to host four convenient meetings rooms for talks with clients. All of them feature modern equipment for video and audio conferencing and presentations and provide an enhanced setting for business sessions and negotiations.

"The expansion of our Vienna office comes as a response to the increasing number of client meetings. This is a very positive trend driven by the growth in sales, in part thanks to our new projects. We hope our clients will appreciate the convenience of these new facilities, and look forward to even more productive meetings ahead," said Andrey Frolov, CEO of SIBUR International GmbH.
